Battlefield Effects Simulator (BES) II

PM TRADE

Description/Summary of Program Requirements:

BES II will produce a flash/bang and smoke signature, which simulates/replicates a large caliber weapon fire of a hostile threat.

BES II will simulate/replicate an impact round on an armor target using M34 (LA54) (Hostile Fire) Cartridges and M35 (LA53) (Target Hit) Cartridges.

It is anticipated that the Government will require delivery of up to 1200 or more BES launcher systems with associated equipment, initial spares, New Equipment Training (NET), and installation support for Fiscal Years 2012-2017 at various Army Installations world-wide.

CTC Live Fire Modernization

PM TRADE

Description/Summary of Program Requirements:

Procures and installs capabilities for the CTCs to support the transition from Mission Rehearsal Exercise/Situational Training Exercise (MRE/STX) rotations to Full Spectrum Operations (FSO) against a hybrid threat.

Requirements/Capabilities:

- Replaces Armor Tank Kill Simulators (Hoffman Devices) with the Battlefield Effects Simulator (BES)
- Refreshes/Replaces obsolete Target Lifters and Thermal Signature Devices
- Updates the Range Control System for the Targets

Current Contract/Original Developer/OEM

- Multiple contractors provide current CTC-IS capabilities. The LT2 FTS strategy provides a portal to share common solutions among all CTCs.

Homestation Instrumentation Training System EXCON (HITS EXCON)

Description/Summary of Program Requirements:

Provides deployable instrumented training capability to support platoon thru battalion level Live collective Force-on-Force maneuver training. HITS tracks locations of soldiers and vehicles and simulates weapons effects, allowing units to Train as they Fight against live opponents. HITS provides accurate feedback to training units. HITS consists of deployable components that can be rapidly assembled/disassembled and transported to support deployed training. HITS is integrated with legacy and future TES.

Acquisition Strategy

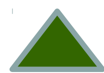

- Mature, demonstrated capability; using LT2 ICDs
- 8(a) Small Business
- Life cycle support through PBL

Period of Performance

- Single IDIQ; five year contract with four ordering periods
- Qty: 21 sites

Target Modernization Non-Contact Hit Sensor Development

PM TRADE

Description/Summary of Program Requirements:

The Non-Contact Hit Sensor will be designed and developed to track the location of miss and hit for both supersonic and subsonic munitions on live fire training ranges. Current small arms technology only supports supersonic munitions. The ability to detect subsonic rounds will lead to greater training fidelity in the realm of armored gunnery training as well as live fire exercises utilizing counter defilade and air-burst weapons, such as the MK-19 and M203. Portability, scalability, and stand-alone operations are key factors.

Target Modernization Common Armor Target Silhouette Development

PM TRADE

Description/Summary of Program Requirements:

The Common Armor Target Silhouette will be designed and developed to create a standard armor silhouettes usable on all live fire training ranges, allow for the creation of a National Stock Number to support ordering and resupply, and reduce the overall weight of the armor silhouette. The aim will focus of the manufacturing, replication, recycling, durability, and ability to support current Combat Identification (CID) technologies. This effort will develop only a limited number of target silhouettes; if the concept/technologies prove viable, additional silhouettes will be developed. All silhouettes parameters are defined within TC 25-8.

PM TRADE implements new internal processes as a result of Tiger Team findings
After four months of analyzing our processes, conducting post mortem reviews of past and current programs, surveying our workforce, and listening to industry comments we are implementing a broad spectrum process that encompasses four key acquisition planning mission areas: Requirements Planning, Technical and Logistics Planning, Acquisition Planning, and Requirements Analysis. The PM TRADE Process Map facilitated by the Strategic Requirements Integration Team targets Process, Product, and Organizational improvements.
EDGE Call for Innovation
TRADOC Pamphlet (Pam) 525-8-3, The U.S. Army Training Concept, 2012-2020 (pub 7 Jan 2011), is the Army's visualization of how it will provide training for units to execute full-spectrum operations in a joint, interagency, intergovernmental, and multinational operational environment. This concept identifies desired current and future capabilities to overcome anticipated challenges in the training environment. This environment is characterized by persistent conflict, uncertainty and surprise in which there are multiple complex challenges across the globe.
